

14) Confined Disposal Unit – in the presentation to the Board, the region identified two alternatives for disposal of dredge spoils: off-site disposal at a commercial landfill, and on-site disposal in a confined disposal unit (CDU). The preferred alternative does not identify which of these disposal options is preferred. The Board recommends that the Proposed Plan that is presented to the public identifies a preference for off-site or CDU disposal, and that the Record of Decision makes a final selection.
